Employees

**12**  
Global Centres

### Material Masters

Comprehensive data standardisation and enrichment services, eliminating duplicates and creating compliant data

### Dictionary Consultants

Business as Usual cataloguers, Dictionary consultants and material data cataloguers govern your material master

### Service Masters

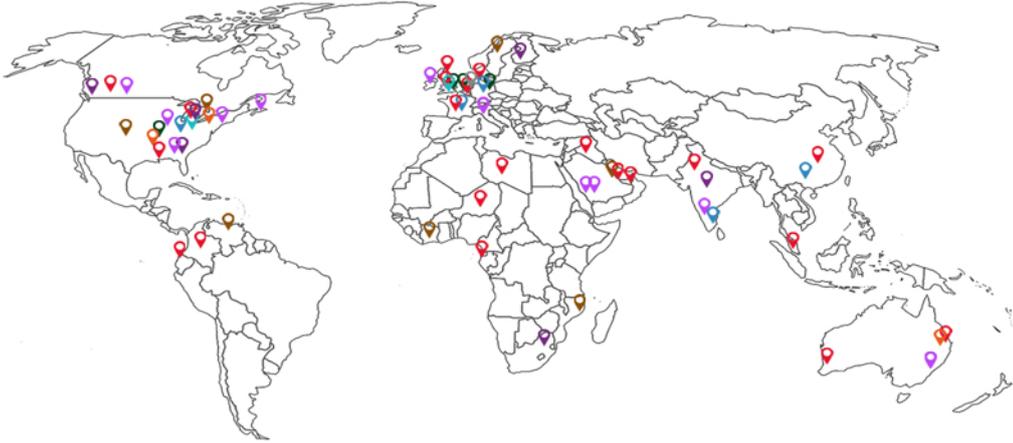

Codify and structure services spend, create hierarchies, master your services and eliminate costly free-text spend

### Vendor Masters

Creation, rationalisation, de-duplication and management of vendors, as one-off projects and ongoing governance

OIL GAS • ENERGY • FOOD & BEVERAGE • MANUFACTURING

MINING • CONSTRUCTION • PHARMA & HEALTHCARE • TRANSPORT

We provide superior quality master data services that transform unstructured, incomplete and duplicated materials data into unique, standardised and enriched foundational master data which benefits engineering and maintenance, improves operational performances and reduces procurement costs
